

2018

MACNA 

A new season always brings changes.

Some of them are big, some of them are subtle, and some of them are.... Both?

For instance, the new logo mark. Because we have made the transition in steps, the update felt subtle and natural, even though it's a pretty big feat! And for 2018, it's been fully implemented in all our media outings as well as the collection itself.

And the collection... well, obviously there's change on that front too! We've worked hard to bring more models and innovations to suit the needs of the modern motorcyclist - whether it's the café racer fanatic, the all-weather long distance commuter or the track day enthusiast: we got their back!

So have a look and enjoy the ride!

CHOOSE YOUR **STYLE**

These days, the motorcycle market and its riders' demands are becoming more and more diverse, and you'll find this reflected through our entire product range. So to keep everything nice and convenient, we've divided our products into three different styles.

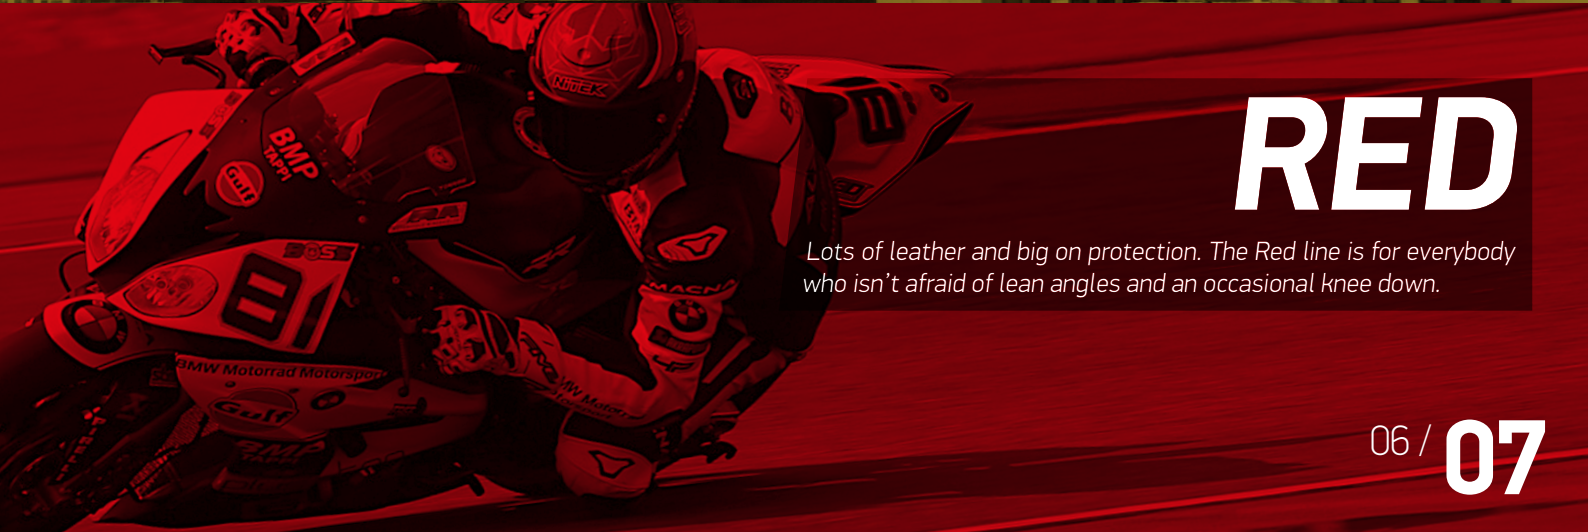

CORE

Functionality, comfort and innovation come together in the Core collection. Ready for endless miles of riding in all kinds of conditions.

GRAPHITE

Fashionable yet functional: the Graphite line offers a casual look and feel without compromising safety.

RED

Lots of leather and big on protection. The Red line is for everybody who isn't afraid of lean angles and an occasional knee down.

IT ALL
STARTS
WITH AN **IDEA**

It can be a styling idea for the next jacket, or maybe a technical concept for a glove: there's always a flow of ideas going on. Some come up during a ride, others come up while showering or walking the dog. Inspiration is everywhere. The ideas are translated into a quick sketch, of which there are many lying around at our design department.

..WHICH EVENTUALLY FINDS ITS
WAY TO THE **SCREEN..**

If the concept is worth pursuing, it will be converted to a digital drawing. It shows all the panels, materials and parts that are going to be used, much like a blueprint. Then it's time to add instructions and directions, so that the manufacturer can work his magic and turn it into something real.

..AND A
SAMPLE
IS BORN

It's always exciting to see a new creation in the flesh! But many times, the first sample doesn't look like the product you see in the stores: it can have temporary substitute parts, different colors, and other materials. But that's okay, as the first sample gets tested, cut and resewn, and drawn upon to make steps towards an end product.

TIME TO **HIT** THE **ROAD!**

After a few samples, feedback and modifications, the product starts to look exactly as intended, and it's about time to take it for a spin! Sometimes as a group, sometimes solo, but it always leads to insight and improvement. Though it's not limited to only the new models: some older or current products are tested on the long run. And, admittedly, we also do it because we simply like a good ride!

If all is well, we can give our green light to start production... and the result is in the pages in front of you.

FULLY LOADED WITH SPECS!

Sometimes, a small improvement can make a big difference. Such is the case with the Click Puller. And sometimes, innovation comes in a more prominent form, such as the airy Summer Comfort System. And what about some game changers, such as the Comfix and Night Eye technology? The list goes on and on, but whatever the size or form may be, we'll always be looking for ways to improve your ride. It's what we're known for, it's what we try to do best!

SMD

RAINTEX**DL**

LIGHT AND DRY

Raintex DL will keep water out. Not only away from your shirt but completely outside the jacket. The breathable waterproof layer is laminated directly to the outer shell, leaving no space in between these layers to store water. Because only the outer shell gets wet, the jacket will dry fast and breathability remains intact.

So what's the difference with a conventional system?

Well, these so called z-liner systems absorb water. It will pass through the non-waterproof outer shell and only get blocked by the waterproof layer inside. Water will get trapped in between layers, behind plastic protectors, and soak your liner.....your jacket will end up drenched! Furthermore, the breathability is no longer intact and you will feel cold because of water running down the membrane.

WHAT YOU OUGHT TO **KNOW** ABOUT ALL **MEMBRANES**

All membranes, no matter what brand or construction, will block water but can let water vapor through. But it will only do so under certain circumstances. Let's forget about the differences in specs and quality of the membranes for a while and concentrate on the principle.

The key word is difference. There will only be migration of vapors if there's a difference. On one side it should be more than the other. The gas or vapor will want to go there where the least vapor is, until it is the same everywhere. The membrane however has no idea about front and back, so it can go both ways.

Always keep in mind that there are circumstances and effects that could let the water go inside your gear instead of out. If it's more humid and warm outside than inside your gear, vapor will be drawn in. This could also happen on your seat, where water remains, and temperature is higher. You might get the idea your gear is leaking, but in fact it's just your membrane doing its job.

Some examples:

- Pants' crotch appear to leak because the water is heated up on the seat creating a lot of vapor. It can hardly reach the open and it is dryer on the inside than outside your pants. Transport of vapor in the "wrong" way.
- Gloves feel wet and cold, yet the water is outside the membrane. The water runs over the membrane almost directly over your skin, cooling the surface constantly. The same effect can also happen with jackets and pants. When it's not very warm outside, it's often better to keep the thermo liner in as well, to avoid the water cooling effect.

COMFIX

Always a perfect fit with Comfix - just click and slide the clip into the right position on the railing. Scratching velcro closures or single position snap closures are a thing from the past.

EST. 2014

AQUA STOP

Finally a proper substitute for zippers whenever 100% water-proofness is needed. It has no conventional zipper teeth and even seals an opening in a direct laminated jacket.

EST. 2014

AIR VENTS

Getting slightly overheated? Then it's time to start opening air vents. Either with a small zip to let air in or unveiling complete mesh panels, cool air can enter simply without much of a hassle.

FULLY VENTILATED

If the temperatures really exceed the normal summer values, a ventilation zipper with small opening just won't cut it. A fully vented jacket or pants will still keep you packed in safely and with all function you normally like, but it feels close to riding in a T-shirt. Large mesh ventilation panels placed at the most sufficient areas will let wind in and out without much resistance.

MACNA

SUMMER COMFORT SYSTEM

Experience a real win-wind situation with the Summer Comfort System. When the temperatures rise, it's a breeze to make your jacket cool. Simply zip off the front panel and let the unveiled mesh panel do the rest.

EST. 2004

SUMMER **COMFORT** SYSTEM **LITE**

Instead of having a panel that can be unzipped completely, the Lite variant features just one zipper. It can be attached in two different ways; one of which reveals a long strip of mesh.

EST. 2016

NIGHT EYE

If jackets could have a split personality, they would probably look like this. Common grey by day, incredibly luminous at night: when placed in the range of a car's headlights, it'll light up completely!

So how does this radiant fabric exactly work? Basically, it's coated with lots of tiny beads. They act as satellite dishes, reflecting light back to its source, even from long distances. Indeed, just like a traffic sign!

EST. 2016

BY DAY

BY NIGHT

DUCATI

NIGHTEYE 

SIDE EYE

It's Night Eye's little brother - implemented on the flanks on many of our products, boosting your visibility on the sides while still looking discreet by day.

EST. 2003

BELT LOOP

Attaching your jacket or hoodie to almost any kind of pants is possible with the Belt loop. Just wrap the loop around your belt and snap it closed.

EST. 2005

CLICK PULLER

No more high-speed flapping and vibrations with the Click Puller: after zipping up, it can be fixed into position. Clean, simple and highly effective.

EST. 2006

EASY CUFF

We got a trick up our sleeve: Easy Cuff. The connection between the detachable membrane and outer shell is placed at the outside instead of the inside. No more annoying loops or snaps, no more messy layers: it's all about easy access. Nice and tidy!

EST. 2004

VISION VEST

PREPARED

Two integrated buckles at the front and a small zipper on the back. That's all you need to secure a Vision Vest. It can remain attached to the jacket at all times and won't interfere with the jackets' functionality - except for boosting your visibility, of course!

EST. 2008

HOT VEST

PREPARED

Using thermo liners and special base layers, but still feeling cold? If your jacket has preparation for the Hot Vest, you're in for a treat. The battery powered vest will provide heat at the most effective areas. The battery provides up to three hours of heat - depending on heat intensity - and can be placed in a pocket in the liner so it won't hinder your movement.

EST. 2014

**HOT VEST
PREPARED**

R.I.S.C. PROTECTION

R.I.S.C. Knee

First introduced in our MotoGP / WSBK suits, the knee protector has found its way into the consumer market through the Voltage suit. The dual density TPU material provides extra protection and abrasion resistance.

EST. 2017

R.I.S.C. Shoulder

These shatter-proof dual density TPU shoulder protectors are solid as a rock. They add safety and durability by covering the seams on critical spots.

EST. 2011

KNEE SLIDERS

A mix between good ergonomics, abrasion resistance and feeling with the tarmac. The TPU knee slider feels at home at the track (or at a nice twisty back road without too much traffic... we won't tell), and was developed with the feedback of the pro's.

EST. 2013

R.I.S.C. Elbow

With tires technology getting better and better, it's no surprise lean angles are getting extremer too. Our elbow sliders are placed at the right spot to ensure you a good feel with the tarmac. The slider block is fixed to the slider by a hex bolt, so when they are worn down, they're easy to replace.

EST. 2011

R.I.S.C. PROTECTION

INTRODUCING
CORE JACKETS

Functionality, comfort and innovation come together in their most advanced form in our Core products. With unique technical solutions and well thought-out constructions, this collection is aimed at making you experience your ride only. And hopefully even forget that you're wearing gear at all.

INTRODUCING
RED SUITS & JACKETS

For the track day fanatics, the weekend warriors out collecting curves, and everybody in between: the Red collection features all that's necessary to seek your limits in a safe way. Doubled leather areas, Kevlar parts, hard shell protectors.... All developed for and with help of racers competing at the highest levels of motorsport.

START YOUR ENGINES

We've been expanding our racing horizon once again, by welcoming more riders to the Macna family throughout the MotoGP and WSBK classes.

As you'd imagine, working together with those riders is a good way to get useful feedback. And it's showing throughout our products; for instance, you'll find a lot of similarities between the new Voltage suit and the gear used by the MotoGP/WSBK riders

But our eyes are not fixed on the main classes alone: we've been scouting talent and promising riders in the feeder classes too. Young guys with a promising racing future ahead of them, proving themselves already in the CEV/ CIV Moto3 championship or the newly added WSS300 class.

RACING SERVICE

MACNA

RACING SERVICE

MACNA

ME

BRING IN THE SUPPORT

Last season saw the introduction of the service truck on the MotoGP paddock! A place where our racing support manager could work comfortably. There's an area where the suits can be serviced, as well as a meeting/lounge room where riders can kick back and relax a little...

WAIST**LOCK** 2.0

Built to last: with this strong buckle, only one simple action is needed to secure or open your pants.

—EST. 2013

WAISTLOCK LITE

Specially developed for our jeans, the Waist lock lite has the extra strength and ease of use of our well known Waist lock, but thinner and more fashionable. Just slide it in until it locks!

EST. 2016

BACKONNECT

A short connection zipper in your Graphite pants, patched onto a velcro panel on the inside. Don't need it? Just take it off. Clean and simple.

EST. 2016

QUICK POCKET

With the entrance of the pocket placed on the outside of the shell, removing the protectors is simple and fast. Your regular washing session just got easier.

EST. 2016

PROTECTOR

The APS fits any standard protector with EN-1621-1 classification.

RAIL

Adjustable rail system which easily let you adjust the position of the knee protector. There are 10 different positions. The APS system is connected to the protector.

RATTLE

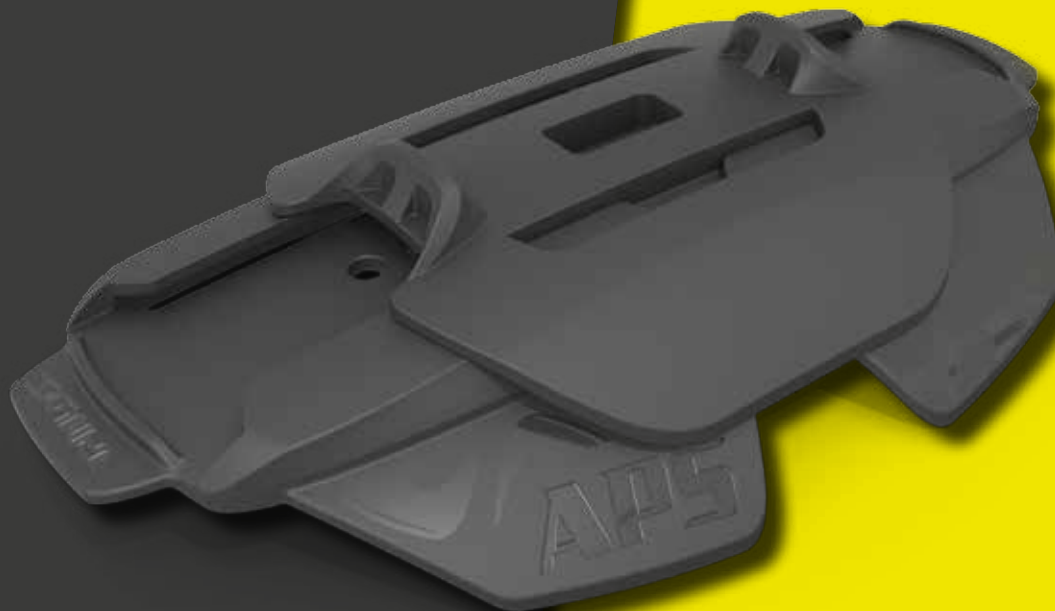

Easy click and slide system that connects the adjustable rail system to the inner lining of the clothing.

APS

The Adjustable Protection System or short for APS, allows riders to adjust the placement of built-in armour to their specific body measurements. This will improve the performance of the protection and the comfort of clothing.

FLEXIBLE MATERIAL

The APS is created from flexible material which helps the protector keep intact by a possible crash.

CLOTHING INNER LINING

The APS system is easy to adjust with one hand and won't be visible on the outside of the clothing.

PINLOCK APS

Properly fitting protective gear is important for rider safety. When getting in an accident the correct placement of the built-in armour in motorcycle gear is important to deliver the highest amount of protection. Not all humans are alike and thigh as well as upper arm length will differ per person.

APS is an Adjustable Protection System that allows riders to adjust the placement of built-in armour to their specific body measurements. This will improve the performance of the protection and the comfort of clothing.

— EST. 2016

INTRODUCING
CORE PANTS

They form a great team together with the Core jackets - whether you're looking for something cool with mesh or something waterproof and warm, these pants are ready for the road.

OUTDRY

Water in your glove? Not a chance when it's equipped with Outdry technology. The waterproof membrane is laminated directly to the outer shell, leaving no space for water to accumulate.

That means no more soggy, heavy gloves that take ages to dry and make you feel cold, as is often the case with a loose membrane.

Outdry takes concrete advantages in terms of waterproofness and comfort:

- The external layer and the membrane are one unique body: no more space in between;
- Water penetration is blocked without any weight increase in wet conditions;
- The membrane has a very high capacity of water vapor permeability;
- There is no seam sealing tape, enabling to exploit 100% of the membrane breathable surface;
- Keep a large volume of dry air between the skin and the membrane, reducing the risk of dew condensation.

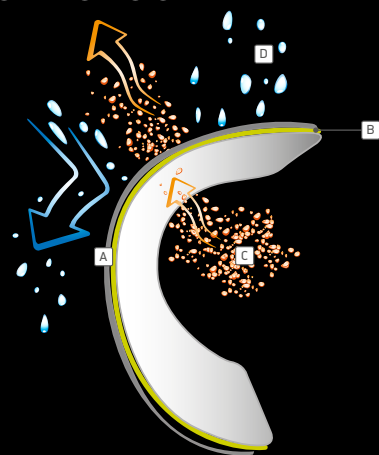

EST. 2012

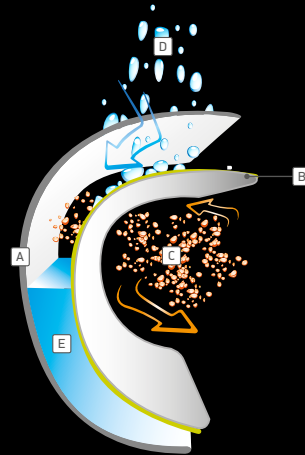

**WATER
NOT
INCLUDED!**

OUTDRY TECHNOLOGY

CONVENTIONAL MEMBRANE

- A - shell
- B - membrane
- C - sweat
- D - rain
- E - absorbed water

R.I.S.C.

PROTECTION

You'll find these external hard shell parts on the knuckle, palm or fingers. They are tough enough to act as a sliding pad, and yet flexible enough to spread the forces of an impact.

EST. 2009

SOFT CE KNUCKLE

Subtly hidden behind the outer shell, the highly flexible CE knuckle protector can absorb the force of an impact.

EST. 2014

TPR PROTECTION

These thick rubber parts on the knuckles bring in extra protection, yet are flexible enough to remain comfortable.

EST. 2007

A close-up photograph of a black knuckle protector. The protector features a circular mesh pattern on its top surface. The word "MACNA" is embossed in white, bold, capital letters across the middle of the protector. The background is dark and textured, likely the glove it's attached to.

MACNA

TOUCH TIP

The index finger has an extra layer of conductive fabric so you can leave your glove on while checking your smartphone or GPS.

EST. 2014

ERGO THUMB

The combined part for the fingers' side wall and thumb gives a wrinkle free look and the reduction of seams also avoids pressure points against the grips of your handlebar.

EST. 2004

HEAT SUPPORT 2015

A fine network of thin heating wire on the topside of the glove gives the extra heat where you usually lose it. Not only will it compensate the loss of warmth through wind chill but it will warm up your hand as well. Depending on the amount of heat, up to 4 hours on a fully charged battery.

EST. 2015

SCREEN CLEANER

Simply sweep the water off your visor with
the integrated rubber rain wiper.

EST. 2004

30° BUCKLE

With the buckle of the wrist strap placed at an ergonomically optimized angle - 30 degrees -, the wrist can move freely.

EST. 2006

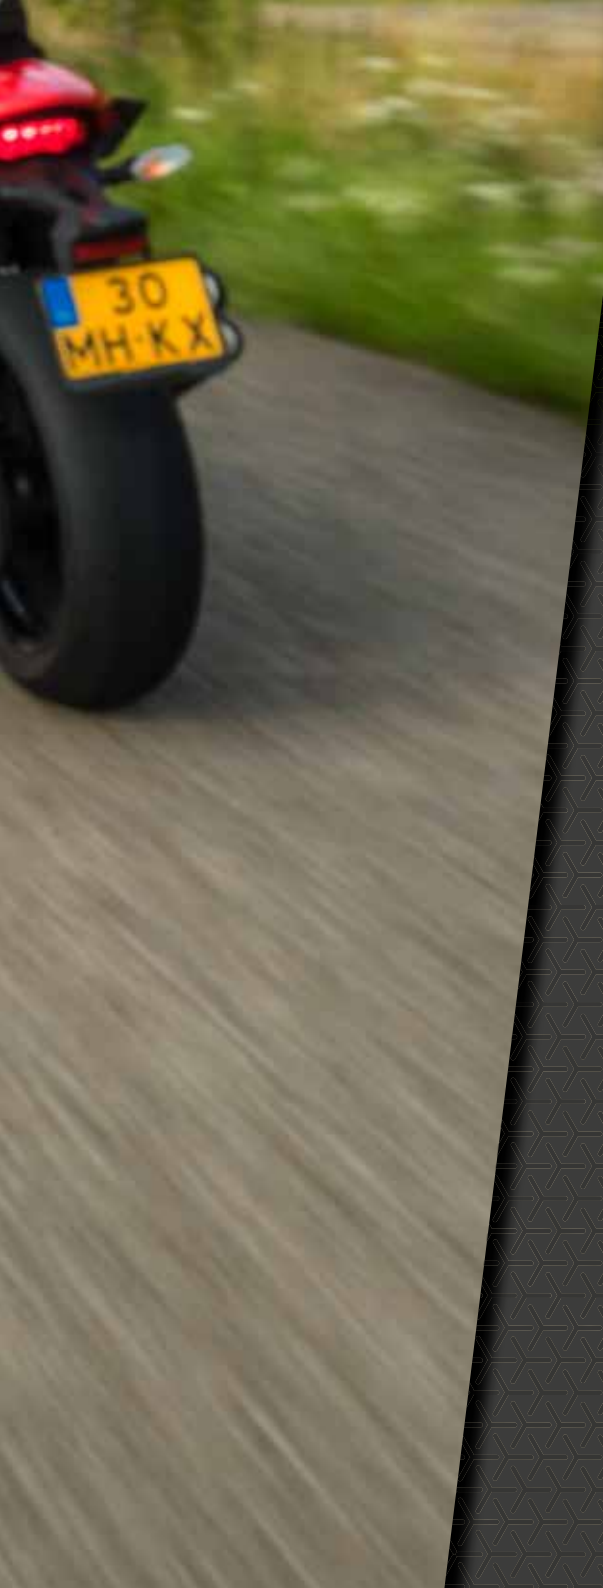

WATER EXHAUST

Though a normal waterproof membrane will keep your hands dry, there can still be water build-up between the membrane and the outer layer. But there's a solution to the problem: a back door for the water to get out. That back door is the Waterexhaust.

EST. 2010

INTRODUCING

GLOVES

From racing gloves to electrically heated winter gloves and everything in between: we're here to lend you a hand in protecting your hands.

NEUTRON

MEN | WINTER | WATERPROOF

ELECTRIC 
HEAT SUPPORT

ART. NO.: 190 6603 | **SIZES:** S-4XL | **COLORS:** 101 | **WEATHER TYPE:** Winter | **MATERIALS:** Goat Leather, Soft flex

What do you get when you mix electric heat support with an Outdry membrane? A glove that doesn't lose its heat when you're driving in the rainy cold. The Neutron is your best weapon against the weather, and features hard external protectors on the knuckle and fingers. The battery is tucked into the cuff.

LINING

Outdry, Bemberg

SAFETY

R.I.S.C. carbon knuckle, TPR finger protection

COMFORT

Electric heated, Ergo thumb, 30° buckle, Touch tip, Screencleaner

ELECTRIC
HEAT SUPPORT 

ART. NO.: 190 6601 | **SIZES:** XS-4XL | **COLORS:** 101 | **WEATHER TYPE:** Waterproof / Winter | **MATERIALS:** Goat leather, Soft flex

For the riders who have to face the real cold: heated gloves. No strings attached, literally, because a small battery and the controller are neatly tucked in the glove itself. And even when the heating's turned off, the Atom will feel warm; thanks to the comfortable Isofur.

LINING

Raintex membrane with Sensigrip, Bemberg, Isofur

SAFETY

TPR knuckle protection

COMFORT

30° roller buckle, Screencleaner, Touch tip, Ergo thumb, Electric heated

FOTON

MEN | WINTER | WATERPROOF

ELECTRIC 
HEAT SUPPORT

ART. NO.: 190 6602 | **SIZES:** S-4XL | **COLORS:** 101 | **WEATHER TYPE:** Waterproof / Winter | **MATERIALS:** Goat leather, Poly 600

Just like its bigger brother, the Foton features electric heating by battery and an integrated regulator. It's made of textile, but has a leather palm, and features EVA foam protection and a warm bemberg lining.

LINING

Raintex membrane with Sensigrip, Bemberg

SAFETY

EVA knuckle protection

COMFORT

Ergo thumb, 30° buckle, Touch tip, Screencleaner, Electric heated

ARCTIQ

MEN | WINTER | WATERPROOF

ART. NO.: 190 6147 | SIZES: S-4XL | COLORS: 101 | WEATHER TYPE: Waterproof / Winter | MATERIALS: Goat Leather, Soft flex

The Arctic is a complete package against the elements; it features the Outdry membrane, as well as thick warm lining (Isofur - soft as a teddy bear). But it's also safe thanks to its knuckle protection, reinforced leather on the palm, and Side Eye elements.

LINING

Outdry, Isofur, bemberg

SAFETY

R.I.S.C. knuckle protection, EVA palm

COMFORT

Ergo thumb, 30° buckle, Touch tip, Screencleaner, Side Eye

PIKE

MEN | WINTER | WATERPROOF

ART. NO.: 190 6141 | SIZES: S-4XL | COLORS: 101 | WEATHER TYPE: Waterproof / Winter | MATERIALS: Goat leather, Soft flex

Winter touring gloves in supple goat leather and some textile, fitted with an Outdry membrane: rain water won't get into the glove, keeping it light and quick dry.

LINING

Outdry membrane, Bemberg, Isofur

SAFETY

TPR knuckle and finger protection

COMFORT

30° roller buckle, Screencleaner, Touch tip, Ergo thumb

INTENSE

MEN | WINTER | WATERPROOF

ART. NO.: 190 6146 | **SIZES:** S-4XL | **COLORS:** 101 | **WEATHER TYPE:** Waterproof / Winter | **MATERIALS:** Goat Leather, Soft flex

Half leather, half textile -but fully winter and waterproof with its Outdry membrane.

LINING

Outdry, Bemberg

SAFETY

EVA palm, knuckle protection

COMFORT

Ergo thumb, 30° buckle, Touch tip, Screencleaner

FUGITIVE

MEN | WINTER | WATERPROOF

ART. NO.: 190 6145 | **SIZES:** S-4XL | **COLORS:** 101, 170 | **WEATHER TYPE:** Waterproof / Winter | **MATERIALS:** Goat leather, Poly 600

FUGITIVE

Waterproof, warm and lots of protection: the Fugitive is a sports glove for the winter. Despite being warmly insulated by the fluffy Isofur, a good feel for the handlebars is maintained: the Ergothumb, several stretch parts on the fingers, and a flexible TPR knuckle protector take care of that.

LINING

Riantex membrane with Sensigrip, Bemberg, Isofur

SAFETY

TPR knuckle protection, R.I.S.C. finger protection

COMFORT

30° buckle, Screencleaner, Touch tip, Ergo thumb

EXILE

MEN | WINTER | WATERPROOF

ART. NO.: 190 6136 | SIZES: S-4XL | COLORS: 101 | WEATHER TYPE: Waterproof / Winter | MATERIALS: Goat Leather, Durylon

Waterproof and winter-ready; Thermolite and Isofur lining give warmth and the long cuff enables a good tuck into the jacket.

LINING

Raintex membrane with Sensigrip, Bemberg, Isofur

SAFETY

TPR knuckle and finger protection

COMFORT

30° roller buckle, Screencleaner, Touch tip, Ergo thumb

ART. NO.: 190 6140 | SIZES: XS-XXL | COLORS: 101 | WEATHER TYPE: Waterproof / Winter | MATERIALS: Goat leather, Soft Flex

A waterproof winter glove, made of Soft Flex and goat leather and fitted with Bemberg and Isofur lining.

LINING

Raintex membrane with Sensigrip, Bemberg, Isofur

SAFETY

TPR knuckle protection

COMFORT

Screencleaner, 30° buckle, Touch tip

HOT VEST

ELECTRIC
HEAT SUPPORT 

UNISEX | WINTER

ART. NO.: 165 8051 | **SIZES:** One size | **COLORS:** 101 | **WEATHER TYPE:** Winter | **MATERIALS:** Polyester, Spandex

With the Macna Hot Vest you will have a comfortable and warm ride in cold weather conditions. It is the solution without the bulk, easy to mount, easy to use. Increased comfort avoids fatigue and contributes to a safer ride and more joy!

A fully charged battery will provide up to 3 hours of heat, depending on the heating level.

LINING

100% Polyester

COOLING VEST EVO

UNISEX | SUMMER

ART. NO.: 165 8055 | **SIZES:** S-M, L-XL, 2XL-3XL, 4XL-5XL | **COLORS:** 808 | **WEATHER TYPE:** Summer

MATERIALS: Nylon Jersey 50%, PU 50% Ultra Fresh®, Anti bacterial treatment

Your body heat and surrounding temperature will slowly make the water inside the vest vaporize. This causes the surface of your skin to cool down before you get all sweaty. Depending on the temperature and humidity, a 500ml fill will last up to 3 days. Good news for riders with a back pack: the filling cap has evolved into a special waterproof zipper construction at the back.

COOLING VEST WET

UNISEX | SUMMER

ART. NO.: 165 8056 | **SIZES:** S-XXXL | **COLORS:** 808 | **WEATHER TYPE:** Summer
MATERIALS: Polyester, Anti bacterial treatment

Wear this under your mesh jacket and you're bound to stay cool. Easy to activate by soaking it in water, the vest will cool you by evaporation up to 8 hours.

ALL SIZES ARE IN CENTIMETRES

All mentioned sizes are an indication. When choosing a product size according to mentioned body sizes you should take the variation from the standard sizing in consideration. If for example you have a waist size M and the hip size L, you will need to choose size L. Only occasionally will one persons different sizes match all measurements within the same standard size. For optimum safety and comfort we recommend to wear the products slim fit. For the best fitting you are advised to visit your local dealer.

SPECS

EXPLANATION

2-Layer system

Jacket or pants have a fixed waterproof layer and detachable thermo liner.

3-Layer system

Jacket or pants have a separately detachable waterproof layer and thermo liner.

30° buckle

The wrist strap buckle is placed under a 30° angle.

3D mesh

Knitted 3 dimensional mesh.

Airvents & Panels

These zippers will, once opened, reveal a mesh air intake. Or various types of panels which can be folded away, uncovering a mesh panel.

Aquastop zippers

The alternative for conventional water repellent zippers, yet 100% waterproof and reliable.

Arm adjustment straps

Width adjustment on the arms to keep the elbow protector in place.

Backconnect

A short connection zipper, fixed on an integrated Velcro panel on the inside of jeans, but removable when not needed.

Backpocket

Large storage pocket at the lower back of the jacket.

Belt loop

A short loop with snap at the bottom of the jacket to connect the back of your jacket to the belt of your pants.

CE protection

Protectors applying to the EN-1621-2 regulations.

Click Puller

Large zipper puller which can be snapped in place to reduce the flapping.

Coat Hanger

Externally placed strong bolted-on plastic hook to hang your coat.

Comfix

The precurved shape and perfect adjustability of the Comfix will make closing simple and flexible.

Connection zippers

A short or long connection zipper enables you to have a safe and wind tight connection between jacket and pants.

Direct Lamination

The waterproof layer and outer shell material are bonded together and appear as one layer.

Easy Cuff

Unique Macna solution keeping the sleeve entrance smooth and free of loose parts, by placing the connection on the outside of the sleeve.

EN471

European standard for professional high visibility work wear.

EN1150

European standard for non-professional high visibility wear.

Ergo thumb

Single part for the forefinger sidewall and thumb.

Flexibelt® 2.0

A double layer waist adjustment solution. The outer part can slide freely over the inner stretch part. The stretch inside follows the waist, the outer part with straps fixes it all together.

Anti slip strips

The printed or welded sticky pattern will keep you in place on your seat.

Heat shield

Textile or leather panels at the bottom of the leg, placed towards the motorcycle, which prevent the pants of melting when touching exhaust pipe or other heat sources.

Hot Vest

Optional electric heated vest, battery operated. For Hot Vest prepared styles only.

Hydration port

Preparation to mount a hydration pack in your race suits' hump.

Isofur

Fur alike material with perfect insulating properties and comfortable feeling.

Lamination

Thermally bonding of two materials.

Led light

Small LED light which can be attached to the Velcro preparation at the back, just below the collar.

Membrane

Waterproof and breathable material/layer.

Night Eye

A textile fabric with a high tech print. The microscopic glass beads in this print work as small mirrors, reflecting light right back where it came from.

Outdry

Direct lamination technology for gloves without need for seam sealing.

Pisciform

A external hard shell part, which works as a sliding or force deviding protector. It especially protects the pisciform bone and it's surroundings.

Pinlock APS

Rail system by Pinlock for simple height adjustment of knee protector from the outside.

Quick pocket®

Pocket entrance from the outside to simply access your knee protector for removal or height adjustment.

Reflective

Light reflecting material, only lights up when light is pointed at it.

R.I.S.C.

Injection moulded external protective parts placed on impact sensitive areas.

Sas-tec CE protectors

Protectors of high quality applying to the EN-1621-1 regulations.

Screencleaner

Visor cleaner integrated in the finger or thumb of the glove.

Sensigrip

Outershell and waterproof mebrane are fixed together in such a way that the movement between the layers is kept to a minimum. Improves grip and feeling with your bike's grips.

Side Eye

Laminated reflective parts at the front and back upper parts of the jacket, with the emphasis on the side.

Superfabric

High performance textile with abrasion resistant dots comparable with leathers' abrasion resistance.

Summer Comfort System

Detachable collar/ front panel unveiling a large mesh panel for ultimate ventilation.

Summer Comfort System Lite

A ventilating mesh strip at the front closure, covered or revealed by choosing a different zipper.

Suspenders

A built in preparation to attach optional suspenders.

Thermo liner

Insulating detachable liner to keep warm.

TPR

Thermoplastic Polyurethane Rubber, 3D parts used for reinforcements and technical details.

Touch tip

A small conductive area on the forefinger for use of touchscreens with your gloves still on.

Twin Shell

Jacket lay-out with a waterproof direct laminated outer shell and a protective leather core jacket.

Vision Vest prepared

Integrated preparation for mounting a Macna Visibility Vest.

Waist-Lock 2.0

A strong holder, fixed with studs, holds a special snap in place. Much stronger than traditional metal hooks, and a lot easier to use.

Waist-Lock Lite

Sturdy fixation of your waist, slides in like a hook, but with the casual look of a snap.

Water exhaust

Mesh area to dispose of water trapped between the outer shell and membrane layers otherwise.

ZipGrip

Rubber grip at the start of a zipper, a lot easier to slide the zip in.

MATERIALS AND FABRIC SWATCHES

Leather, cow embossed

Cow leather with easy to clean embossed upper.

Durylon

Polyamide with Polyester with high abrasion resistance.

Poly 500

Polyester 500d with medium abrasion resistance.

Washable goat aniline leather

Soft drum dyed goat leather specially treated to withstand washing.

Dynamic

Strong stretch textile.

Poly 500

A 100% polyester with medium abrasion resistance.

Poly 600

Polyester 600d with medium abrasion resistance.

R-tech

Polyamide 600d with medium-high abrasion resistance.

Spacetec / 3D mesh

Knitted 3 dimensional mesh.

Uniqotton®
